SJSG FRIDAY FLYER

A message from Miss Seaton

Colossians 3:23 *"Whatever you do, work at it with all your heart."*

This week Oak Class attended a sports competition at another Bedford primary school. As a school we are so proud of the engagement and resilience the children showed, for many of the it was the first time they had been involved in competitive sport. Across the school year, all classes in years 1– 6 will get the opportunity to attend sporting event. We hope all children enjoy their opportunity as much as Oak Class did.

Faith Life

Today Years One and Two made presentations to Mrs. Otter. They have been thinking of ways to protect God's planet and wanted to show her how they will inspire the rest of our school community to care for the school grounds. Mrs. Otter was very impressed with their confidence and dedication.

They then shared the below book as a group.

Introduction

Mrs. Tustain

Mrs. Tustain is our new Special Educational Needs and Disabilities Coordinator (SENDCo). If you would like to make contact with her to discuss your child, please email:

send@sjsg.beds.olicatschools.org

At Home…

Read to you child regularly. Hearing an adult read with fluency and expression is proven to rapidly improve a child's reading ability, if done daily.

Curriculum

This week across our school:

Our **Acorn** children have be enjoying their immersion in the season of Autumn, creating patterns with items such as conkers and acorns.

Children in our **Reception Classes** have been planting cress seeds. Please support your child to look after them at home, so they can see the wonder of God's world growing before their eyes.

In **Years One and Two** the children have been learning to measure in their Mathematics lessons. The children are beginning to understand how to accurately use a ruler when measuring small items.

Children in **Years Three and Four** have been developing their understanding of volcanoes and how they impact human life in the places where they exist. They have also been learning about how volcanoes are formed and why certain locations are more likely to have them than other places.

Year Five children have been continuing to learn about states of matter in their Science lessons. The children have conducted experiments and learnt key vocabulary such as dissolving, filtering and evaporation.

Across **Year 6,** children have been learning what an idiom is. The children have used phrases such as, 'on your bike' and 'living cheek by jowl' to develop their writing skills.

Important Dates

October is Black History month

Half term is Monday 28th October to Friday 1st November

Children return to school on Monday 4th November
